### A. SUMMARY OF OUR INDUSTRY

By 2025, India's Consumer Electronics and Appliances Industry is predicted to be the fifth-largest in the world. The Indian Appliances and Consumer Electronics (ACE) market is predicted to nearly double in the next 3 years, reaching approximately US\$ 17.93 billion (Rs. 1.48 lakh crore) by 2025. The Indian appliances and consumer electronics industry stood at US\$ 9.84 billion in 2021, and is expected to more than double to reach Rs. 1.48 lakh crore (US\$ 21.18 billion) by 2025. Re-commerce, or reverse supply chain, entails offering new products in exchange for old ones; reselling returned products; repairing defective products; or recycling or refurbishing used products. It has great significance in today’s times when there is growing awareness amongst businesses and consumers about the need to make environmentally responsible choices.

A report by Infogence Global Research estimated India’s re-commerce at USD 29.54 billion in 2022 and projected it to grow at a CAGR of 6.15 percent by 2027. The report points out that the used smartphone market is seeing better margins for retailers compared to the sale of new smartphones. In 2021 alone, India witnessed the purchase of over \$15 billion worth of new smartphones online. With the number of smartphone users reaching the 550 million mark, it is estimated that, on average, a re-commerce app user sells more than two smartphones from each household when the need to upgrade to new devices rises, as per Red Seer's research.

Prior to making an investment decision, prospective investors should carefully consider all of the information contained in the section titled “Financial Information, as Restated” beginning on page number 139 of this Draft Red Herring Prospectus.

If any one or more of the following risks as well as other risks and uncertainties discussed in the Draft Red Herring Prospectus were to occur, our business, financial condition and results of our operation could suffer material adverse effects and could cause the trading price of our Equity Shares and the value of investment in the Equity Shares to materially decline which could result in the loss of all or part of investment. Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India, and is therefore subject to a legal and regulatory environment that may differ in certain respects from that of other countries.

This Draft Red Herring Prospectus also contains forward looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of many factors, including the considerations described below and elsewhere in the Draft Red Herring Prospectus. ## INTERNAL RISK FACTORS

### Business Related Risks:

- 1. Our Company has given Corporate Guarantees of ₹ 565.92 Lakh as on June 30, 2023 in respect to the credit facilities taken by our promoter group company. We cannot assure that there will be no default done by our promoter group entity in the future.**

Our company has extended Corporate Guarantees to support the credit facilities availed by the promoter group company, M/s Rockingdeals Private Limited. These credit facilities include a cash credit limit of Rs. 495.00 lacs and a guaranteed emergency credit line of Rs. 70.92 lacs as on June 30, 2023. Further, the company has utilized its property as collateral for the aforementioned credit facilities.

We cannot assure you that there will be any default in the re-payment by the group entity in the future. If any default commits by our group entity, it may affect our business. This would mean that we would have to pay off the loan on behalf of our group entity, which would impact our cash flows and financial position. Additionally, this could lead to a deterioration in our relationship with the banks extending the loan to our group entity, making it harder for us to secure loans in the future. Beyond the financial implications, a default by our group entity could also dent our reputation and credibility in the market. Lenders and other stakeholders may question our ability to manage our affairs, which could result in loss of confidence and a decline in the value of our securities. This could, in turn, impact our ability to raise capital and grow our business in the long run. There have been no instances of crystallization of guarantees in the past. This indicates that our company and associates have been able to meet their loan obligations without triggering the need for the corporate guarantees to be invoked. While the absence of past crystallizations is positive, it is important to consider that the risk of crystallization remains present in the future. Unforeseen events or financial difficulties faced by our group entity could potentially lead to the invocation of the guarantees. In such a scenario, our company would be required to honour the guarantee and make the repayments on behalf of its group entity.

- 2. We may continue to derive a material portion of our revenue from our top five customers, which include Rockingdeals Private Limited/ Harkrishanji Products Private Limited/ Rockingdeals (HYD) Private Limited (Our Promoter Group Companies). Any loss of business from one or more of top 5 customer may adversely affect our revenues and profitability.**

At present, we derive most of our revenues from the sale of products from limited number of customers.

Any decline in our quality standards, growing competition and any change in the demand for our product by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generated from these clients might change as we continue to add new clients in normal course of business. We intend to retain our customers by offering solutions to address specific needs

in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

**3. Majority of our state wise revenues from operations for the last 3 years is dependent majorly on Haryana. Any adverse developments affecting our operations in these states could have an adverse impact on our revenue and results of operations.**

Geographical distribution of our revenue bifurcated on page no. 95 of this Draft Red Herring Prospectus, Majority of state wise revenue is contributed from Haryana i.e 48.73%, 74.13%, 59.38% of our revenues for the year ended March 31, 2023, 2022 and 2021 respectively. Such concentration of revenue in Haryana may have an adverse effect. Further, drastic change in Taxes and other levies imposed by State Government of Haryana as well as other financial policies and regulations, political and deregulation policies, if changed, could harm business and economic conditions. However, the composition and revenue generated from various states might change as we continue to add new customers in the different parts of India.

**4. Our Company procure the product from various brands or external vendors for sourcing the product requirements. Also, we do not have long-term agreements with our suppliers and an inability to procure the desired quality, quantity of our products at acceptable prices, may adversely affect our business, profitability and reputation.**

At present, we derive most of our purchase from limited number of vendors.

Particular	As on March 31, 2023	As on March 31, 2022	As on March 31, 2021
Total Purchases	1059.68	1290.87	898.53
Top 5 Suppliers	606.73	1,110.21	654.09
<b>% of top 5 suppliers to total purchases</b>	<b>57.25%</b>	<b>86.00%</b>	<b>73.00%</b>

Our ability to remain competitive, maintain costs and profitability depend, in part, on our ability to source and maintain a stable and sufficient supply of our products at acceptable prices. The absence of long-term supply contracts subjects us to risks such as price volatility caused by various factors.

Further, we cannot assure you of our ability to enter into any agreements with our existing suppliers on terms acceptable to us, which could have an adverse effect on our ability to source supplies in a commercially viable and timely manner which may impact our business and profitability. Discontinuation of such supply or a failure of these vendors to adhere to the delivery schedule or the required quality could hamper our sales and therefore affect our business and results of operations.

**5. There is risk of Forward or Downward Integration by our supplier to directly start selling their products to the end customer or our clients.**

Forward or Downward Integration means manufacturer or suppliers start selling their products to the end consumer. As our business is dependent on the supply of products from the various e-commerce platform or manufacturers for the open boxed or excess inventory. There is always a risk from our supplier that they directly start selling their products to the end consumer or our clients. In that scenario, the supply of the product gets disrupt and we will not able to fulfil the demand for our clients. It will have an adverse effect on our business, cash flows, financial condition and results of operations.

**6. Our inability to expand or effectively manage our B2B Partners/ Vendors network may have an adverse effect on our business, results of operations and financial condition.**

Our ability to expand and grow in B2B is somehow dependent upon our B2B Vendors, to whom we sell our bulk inventories. We continuously seek to increase the penetration of our products by appointing new vendors targeted at different customer groups and geographies. We cannot assure you that we will be able to successfully identify or appoint new vendors or effectively manage our existing network. If the terms offered to such vendors by our competitors are more favourable than those offered by us, vendors may decline to distribute our products and terminate their arrangements with us. We may be unable to appoint or replacement vendors in a timely fashion, or at all, which may reduce our sales volumes and adversely affect our business, results of operations and financial condition.

**7. Our company "Rockingdeals Circular Economy Limited" and our promoter group companies "Rockingdeals Private Limited" and "Rockingdeals (HYD) Private Limited" are working under the same brand name "Rockingdeals".**

As our company and our promoter group companies are working under the same brand names. There are several risks which our company may face in future:

- If any of the promoter group companies faces a significant issue, such as a scandal, financial crisis, or product recall, it can tarnish the brand's reputation.
- Operating under the same brand can create confusion in the market about the distinct identity and operations of individual company within the group. This might hinder our company's ability to establish its unique presence.
- In some cases, operating under the same brand can lead to legal and regulatory challenges, if any of our promoter group company faces the regulatory action, it will impact brand image of our company also.

**8. Our inability to accurately forecast demand for our products, and accordingly manage our inventory, may have an adverse effect on our business, cash flows, financial condition and results of operations.**

Our inability to accurately forecast demand for our products and manage our inventory may have an adverse effect on our business, cash flows, financial condition and results of operations. We do not have long term supply agreements with our customers and instead rely on short term purchase orders to govern the volume and other terms of the sales of products. Accordingly, we plan our volumes based on our forecast of the demand for our products. Any error in forecasting could result in surplus stock which would have an adverse effect on our profitability.

Our high level of inventory increases the risk of loss and storage costs to us as well as increasing the need for working capital to operate our business. In the event that the demand we have forecasted is lower than the actual demand of our products, and we are unable to match such demand, we may be unable to supply the requisite quantity of products to our customers in a timely manner, which could have an adverse effect on our business, cash flows, financial condition and results of operations.

**9. We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.**

Our success heavily depends upon the continued services of our Key Managerial Personnel, along with support of our Promoters. We also depend significantly on our Key Managerial Personnel for executing our day-to-day activities. The loss of any of our Promoters and Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and Key Managerial Personnel, please refer to chapter —Our Management|| beginning on page 115.

**10. Our company and group companies are involved in certain legal proceeding(s) potential litigations, departmental notices and tax proceedings. Any adverse decision in such proceeding(s) may render us/them liable to liabilities/penalties and may adversely affect our business and results of operations.**

We are involved in certain legal proceedings which are pending at different levels of adjudication before various courts, tribunals, enquiry officers, and appellate authorities. We cannot provide assurance that these legal proceedings will be decided in our favour. Any adverse decisions in any of the proceedings may have an adverse effect on our business, results of operations, cash flows and financial condition. A classification of these legal and other proceedings are as follows:

**11. There are certain discrepancies and non-compliances noticed in some of our corporate records relating to forms filed with the Registrar of Companies and taxation authorities.**

In the past, there have been some instances of delays in filing statutory forms with the RoC such as MGT-7, MGT- 14, AOC-4, DPT-3, MR-1 with the additional fees. Also, we have delayed in filing few of our GST returns, TDS Returns, Advanced Tax, EPF returns with the concerned offices on several instances and have accordingly been subjected to penalty and charged with interest for delayed deposit of tax on various instances.

Further with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

*\*subject to escalation rate of 5%*

The registered office and warehouse premises are owned by our promoter group Company M/s Rockingdeals Private Limited and our promoter Mr. Aman Preet. In case of conflict of Interest our company has required to vacate the premises.

Unless the lease of our premises is renewed, upon termination of the lease, we are required to return the premises office to the Lessor/Licensor. There can be no assurance that the term of the agreements will be renewed on commercially acceptable terms and in the event the Lessor/Licensor terminates or does not renew the agreements, we are required to vacate the said premises where operational activities are carried out. In such a situation, we have to identify and take alternative premises and enter into fresh lease or leave and license agreement at less favourable terms and conditions to shift our registered office and operations. Such a situation could result in time overruns and may adversely affect our operations temporarily.

**15. One of our lease agreement has not been registered as a result of which our operations may be affected.**

Our lease agreement for the store situated at 5N/44A, K.C. Road, Near, BTW, NIT 5, Faridabad (Haryana) has not been registered under the Registration Act 1908. The effect of non-registration is that the document is not an admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for non-registration. The effect of non-registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non-compliance of local laws relating to registration may impact the operations of our Company.

**16. We operate in a competitive environment and face fair competition in our business from organized and unorganized players, which may adversely affect our business operations and financial condition.**

The industry in which the Company operates is fairly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by competitive pricing, latest consumer trends and technology. These frequent changes and their impact on consumer demand may result into both price and demand volatility, leading to change in the competitive scenario. Due to the expansive nature of our business, we face competition from various kinds of players including, players operating in retail, wholesale and e-commerce space. Competition may result in pricing pressures, reduced profit margins, lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. We compete primarily on the basis of quality of our services, customer satisfaction. We face various competitive challenges, few are:

- pricing our products to remain competitive while achieving a customer perception of comparatively higher value;
- anticipating and quickly responding to changing consumer demands;
- maintaining favorable brand recognition and effectively marketing our products to consumers in diverse markets;
- providing strong and effective marketing support;

Thus, some of our competitors may have certain other advantages over us, including established track record, superior service offerings, larger portfolio of services, technology and greater market penetration, which may allow our competitors to better respond to market trends. They may also have the ability to spend more aggressively on marketing initiatives and may have more flexibility to respond to changing business and economic conditions than we do. We believe that in order to compete effectively, we must continue to maintain our reputation, be flexible and prompt in responding to rapidly changing market demands and customer preferences, and offer customer quality services at competitive prices. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

**17. The possibility of defective products could result in liability issues and harm our reputation.**

As we engaged in the business of unboxed or excess inventory, there are huge chances of receiving defective and damage product from our vendors, therefore our business is inherently exposed to the risk of product liability, which arises due to the possibility that some manufacturers or vendors may not offer warranties for their products. In such cases, if the product found defective our company has to bear the cost of such defective products. Further the defective product led to costs associated with product repairs. Furthermore, if our products are sold without identifying the defect or perceived as defective and receive negative publicity, it could harm our brand image and reputation. Consequently, any of these factors has the potential to significantly and negatively impact our business, financial standing, and operational outcomes.

**18. The possibility of counterfeit or fake products could result in liability issues and harm our reputation.**

Our company engaged in the business of open boxed, excess inventory and refurbished products there are high chances of receiving counterfeit and fake products from our vendors, henceforth our business is exposed to the risk of product liability. Therefore, if our products found fake or counterfeit then it will lead to negative publicity which will harm the reputation and

brand image of the company. Consequently, it has the potential to impact our business, financial positions and operational outcomes.

**19. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.**

As on date of this Draft Red Herring Prospectus, we have obtained various insurance policies such as insurance coverage in respect of certain risks related to stock. We face the risk of loss resulting from product liability, warranty, and other lawsuits, whether or not such claims are valid. Moreover, our insurance coverage may not be adequate to cover such claims or may not be available to the extent we expect. Although, we attempt to obtain coverage for and mitigate our liability for damages arising from negligent acts, errors or omissions through insurance policies, our liability may sometimes not be covered as a result of the limitations of liability set forth in our insurance policies. For details of insurance policies we maintain, see “Business – Insurance” beginning on page 88 of Draft Red Herring Prospectus.

**20. We have applied for registration of logo  and do not own the trademark legally as on date. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third-party intellectual property rights.**

We have applied for registration of our name and logo under the provisions of the Trademarks Act, 1999 and do not own the trademark as on date. As such we do not enjoy the statutory protections accorded to a registered trademark as on date. We are in the process of for registration of our logo under the provisions of the Trade Marks Act, 1999. There can be no assurance that we will be able to register the trademark in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Further, we cannot assure you that any application for registration of our trademark in future by our Company will be granted by the relevant authorities in a timely manner or at all.

Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

**21. Quality concerns and negative publicity, if any, would adversely affect the value of our brand, and our sales.**

Our business is dependent on the trust our customers have in the quality of our products as well as on our ability to protect our brand value. Any negative publicity regarding our Company, brands or products, including those arising from a drop in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our brand value, our operations and our results from operations.

**22. We may not be able to sustain effective implementation of our business and growth strategy.**

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business plan but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

**23. Our growth will depend on our ability to build our brand and failure to do so will negatively impact our ability to effectively compete in this industry.**

We believe that we need to continue to build our brand, , which will be critical for achieving widespread recognition of our services. Promoting and positioning our brand will depend largely on the success of our marketing efforts and our ability to provide high quality services. The brand promotion activities that we may undertake may not yield increased revenues, and even if they do, any increased revenues may not offset the expenses we incur in building our brand. If we are unable to promote and maintain our brand, our business, financial condition and results of operations could be adversely affected.

**24. *The outbreak of COVID-19 or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.***

One significant risk factor related to COVID-19 is the disruption in supply chains. Due to the pandemic, many countries implemented lockdowns, travel bans, and restrictions on economic activities. If for any reason the same situation arises in the upcoming areas, it may affect our supply or demand schedules, potentially leading to delays of product delivery. Moreover, the manufacturer who sourced their components or raw materials are sourced from heavily affected regions, their production and distribution may be severely impacted, causing prolonged delays in fulfilling demands or even halting production altogether. The risk of disruption in supply chains highlights the importance for companies to diversify their supplier base geographically and establish contingency plans for alternative sources of essential components. However, the uncertainty and risk associated with COVID-19 cannot be completely ignored.

**25. *Our inability to manage growth could disrupt our business and reduce profitability.***

A principal component of our strategy is to continuously grow by expanding the capacity, size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

**26. *In addition to normal remuneration, other benefits and reimbursement of expenses some of our Promoters who are directors as well, hold Equity Shares in our Company and may be interested in our Company to the extent of interest received on loan given, their shareholding and dividend entitlement in our Company.***

Our Promoters who are directors as well are interested in our Company to the extent of interest received on the loan given to the company and their shareholding and dividend entitlement in our Company, in addition to regular remuneration or benefits and reimbursement of expenses. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Promoters may take actions with respect to our business which may conflict with the best interests of our Company or that of minority shareholders. For details on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see the sections titled "Our Management" and "Our Promoters and Promoter Group" on pages 115 and 128 respectively of this Draft Red Herring Prospectus.

**27. *We have not made any dividend payments in the past and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.***

In the past, we have not made dividend payments to the shareholders of our Company. The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows and requirement to fund operations and expansion of the business. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors. For further details, please refer "Dividend Policy" on page 138 of this Draft Red Herring Prospectus.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company has entered presently and may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details regarding our dividend policy, please see "Dividend Policy" on page no 138 of this Draft Red Herring Prospectus.

**28. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.***

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

**29. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.**

Under current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian Company are generally taxable in India. Any gain realized on the sale of listed Equity Shares on a stock exchange held for more than 12 months shall be subject to capital gains tax in India at 10% of such capital gain exceeding Rs. 1 lakh if Securities Transaction Tax (STT) has been paid on both acquisition and transfer of such shares. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realised on the sale of Equity Shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. However, any gain realized on the sale of listed Equity Shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India. For more details, please refer to —Statement of Tax Benefits|| beginning on page 72.

Prior to this Issue, there has been no public market for our Equity Shares. [•] is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Maker, please refer to the section titled —General Information – Details of the Market Making Arrangement|| for this Issue beginning on page 40

The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

3. Speculation in the press or investment community;
4. General market conditions; and
5. Domestic and international economic, legal and regulatory factors unrelated to our performance.

**EXTERNAL RISK FACTORS**

**1. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.**

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

**2. Changes in Government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.**

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government.

These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

**3. *If inflation rises in India, increased costs may result in a decline in profits.***

Inflation rates in India have been volatile in recent years, and such volatility may continue. Increasing inflation in India could cause a rise in the costs of rent, wages, raw materials and other expenses. If we are unable to increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse

**4. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.***

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- Custom duties on imports of raw materials and components;
- Goods and Service Tax

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

**5. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.***

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. **8. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.***

factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

**9. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. ## BASIS FOR ISSUE PRICE

The Price Band and the Issue Price will be determined by our Company in consultation with the BRLM, on the basis of the Book Building Process and the quantitative and qualitative factors as described below. #### GLOBAL ECONOMIC OVERVIEW

##### GLOBAL ECONOMIC OUTLOOK IN FIVE CHARTS

Global economic activity is decelerating sharply as a result of synchronized monetary policy tightening to contain very high inflation, less favorable financial conditions, and disruptions from the Russian Federation’s invasion of Ukraine. According to the latest [Global Economic Prospects](#) report, [global growth will slow from 2.9 percent in 2022 to 1.7 percent in 2023. The outlook has several downside risks, including the possibility of higher inflation, even tighter monetary policy, financial stress, and rising geopolitical tensions.](#) To mitigate the impacts of recent negative shocks and promote a strong and inclusive recovery, policymakers need to prioritize reforms that support long-term growth prospects and bolster the resilience of vulnerable groups.

#### 1. The global economy is perilously close to falling into recession

This year, the world economy is set to grow at the third weakest pace in nearly three decades, overshadowed only by the recessions caused by the pandemic and the global financial crisis. Growth has slowed to the extent that the global economy is perilously close to falling into recession—defined as a contraction in annual global per capita income. Major economies are undergoing a period of pronounced weakness, and the resulting spill overs are exacerbating other headwinds faced by emerging market and developing economies (EMDEs).

#### 2. EMDEs are projected to experience subdued growth in 2023, with activity set to remain well below its pre-pandemic trend

In EMDEs, growth prospects have worsened materially, with the forecast for 2023 downgraded 0.8 percentage point to a subdued 3.4 percent . The downward revision results in large part from weaker external demand and tighter financing conditions. Downgrades to growth projections mean that EMDE activity is now expected to fall even further below its pre-pandemic trend over the forecast horizon. Moreover, per capita income growth is expected to be slowest where poverty is highest.

**3. Headline inflation has started to abate but high core inflation in many countries has been unexpectedly persistent**

Global inflation has been pushed higher by demand pressures, including from earlier policy support, and supply shocks, including disruptions to both global supply chains and the availability of key commodities. Inflationary pressures have begun to abate, reflecting softening demand and easing commodity prices, and inflation is rising in fewer countries. Although inflation is likely to gradually moderate through the year, high core inflation in many countries has been unexpectedly persistent.

**4. Risks to the global outlook are tilted to the downside**

The Global Economic Prospects report features model simulations to assess two downside scenarios for the global economy. In the first scenario, central banks tighten monetary policy more than expected in response to rising inflation expectations, resulting in global GDP growth falling to 1.3 percent in 2023. In the second scenario, major central banks' policy rates are even more restrictive, and markedly tighter financial conditions lead to significant financing difficulties across EMDEs, leaving the world in recession.

**5. Global cooperation and decisive national policies are needed to bolster investment and growth prospects**

The overlapping negative shocks of the past three years have weighed on investment—which is set to experience a feeble recovery—and long-term growth prospects in EMDEs. Prioritizing structural reforms to stimulate investment, promote food security, and foster gender equality can help to reverse the impact of these negative shocks and buttress resilience of vulnerable populations. Global cooperation is also needed to mitigate the risk of global recession, debt distress in EMDEs, safeguard the global commodity trading system, and accelerate the clean energy transition.

**Forces Shaping the Outlook**

The global fight against inflation, Russia's war in Ukraine, and a resurgence of COVID-19 in China weighed on global economic activity in 2022, and the first two factors will continue to do so in 2023.

In the fourth quarter of 2022, however, this uptick is estimated to have faded in most—though not all—major economies. US growth remains stronger than expected, with consumers continuing to spend from their stock of savings (the personal saving rate is at its lowest in more than 60 years, except for July 2005), unemployment near historic lows, and plentiful job opportunities. But elsewhere, high-frequency activity indicators (such as business and consumer sentiment, purchasing manager surveys, and mobility indicators) generally point to a slowdown.

**COVID-19 deepens China's slowdown.**

Economic activity in China slowed in the fourth quarter amid multiple large COVID-19 outbreaks in Beijing and other densely populated localities. Renewed lockdowns accompanied the outbreaks until the relaxation of COVID-19 restrictions in November and December, which paved the way for a full reopening. Real estate investment continued to contract, and developer restructuring is proceeding slowly, amid the lingering property market crisis. Developers

have yet to deliver on a large backlog of presold housing, and downward pressure is building on house prices (so far limited by home price floors). The authorities have responded with additional monetary and fiscal policy easing, new vaccination targets for the elderly, and steps to support the completion of unfinished real estate projects. However, consumer and business sentiment remained subdued in late 2022. China’s slowdown has reduced global trade growth and international commodity prices.

### Monetary policy starts to bite.

Signs are apparent that monetary policy tightening is starting to cool demand and inflation, but the full impact is unlikely to be realized before 2024. Global headline inflation appears to have peaked in the third quarter of 2022 (Figure 1). Prices of fuel and nonfuel commodities have declined, lowering headline inflation, notably in the United States, the euro area, and Latin America. But underlying (core) inflation has not yet peaked in most economies and remains well above pre-pandemic levels. It has persisted amid second-round effects from earlier cost shocks and tight labor markets with robust wage growth as consumer demand has remained resilient. Medium-term inflation expectations generally remain anchored, but some gauges are up. These developments have caused central banks to raise rates faster than expected, especially in the United States and the euro area, and to signal that rates will stay elevated for longer. Core inflation is declining in some economies that have completed their tightening cycle—such as Brazil. Financial markets are displaying high sensitivity to inflation news, with equity markets rising following recent releases of lower inflation data in anticipation of interest rate cuts (Box 1), despite central banks’ communicating their resolve to tighten policy further. With the peak in US headline inflation and an acceleration in rate hikes by several non-US central banks, the dollar has weakened since September but remains significantly stronger than a year ago.

(Percent, year over year)

Note: The figure shows the developments in headline and core inflation across 18 advanced economies and 17 emerging market and developing economies. Core inflation is the change in prices for goods and services, but excluding those for food and energy (or the closest available measure). For the euro area (and other European countries for which the data are available), energy, food, alcohol, and tobacco are excluded. The gray bands depict the 10th to 90th percentiles of inflation across economies.

### THE FORECAST BY IMF

Global growth, estimated at 3.4 percent in 2022, is projected to fall to 2.9 percent in 2023 before rising to 3.1 percent in 2024 (Table 1). Compared with the October forecast, the estimate for 2022 and the forecast for 2023 are both higher by about 0.2 percentage point, reflecting positive surprises and greater-than-expected resilience in numerous economies. Negative growth in global GDP or global GDP per capita—which often happens when there is a global recession—is not expected. Nevertheless, global growth projected for 2023 and 2024 is below the historical (2000–19) annual average of 3.8 percent.

The forecast of low growth in 2023 reflects the rise in central bank rates to fight inflation—especially in advanced economies—as well as the war in Ukraine. The decline in growth in 2023 from 2022 is driven by advanced economies; in emerging market and developing economies, growth is estimated to have bottomed out in 2022. Growth is expected to pick up in China with the full reopening in 2023. The expected pickup in 2024 in both groups of economies reflects gradual recovery from the effects of the war in Ukraine and subsiding inflation. Following the path of global demand, world trade growth is expected to decline in 2023 to 2.4 percent, despite an easing of supply bottlenecks, before rising to 3.4 percent in 2024.

These forecasts are based on a number of assumptions, including on fuel and nonfuel commodity prices, which have generally been revised down since October, and on interest rates, which have been revised up. In 2023, oil prices are projected to fall by about 16 percent, while nonfuel commodity prices are expected to fall by, on average, 6.3 percent. Global interest rate assumptions are revised up, reflecting intensified actual and signaled policy tightening by major central banks since October.

For advanced economies, growth is projected to decline sharply from 2.7 percent in 2022 to 1.2 percent in 2023 before rising to 1.4 percent in 2024, with a downward revision of 0.2 percentage point for 2024. About 90 percent of advanced economies are projected to see a decline in growth in 2023.

- In the United States, growth is projected to fall from 2.0 percent in 2022 to 1.4 percent in 2023 and 1.0 percent in 2024. With growth rebounding in the second half of 2024, growth in 2024 will be faster than in 2023 on a fourth-quarter-over-fourth-quarter basis, as in most advanced economies. There is a 0.4 percentage point upward revision for annual growth in 2023, reflecting carryover effects from domestic demand resilience in 2022, but a 0.2 percentage point downward revision of growth in 2024 due to the steeper path of Federal Reserve rate hikes, to a peak of about 5.1 percent in 2023.
- Growth in the euro area is projected to bottom out at 0.7 percent in 2023 before rising to 1.6 percent in 2024. The 0.2 percentage point upward revision to the forecast for 2023 reflects the effects of faster rate hikes by the European Central Bank and eroding real incomes, offset by the carryover from the 2022 outturn, lower wholesale energy prices, and additional announcements of fiscal purchasing power support in the form of energy price controls and cash transfers.
- Growth in the United Kingdom is projected to be -0.6 percent in 2023, a 0.9 percentage point downward revision from October, reflecting tighter fiscal and monetary policies and financial conditions and still-high energy retail prices weighing on household budgets.
- Growth in Japan is projected to rise to 1.8 percent in 2023, with continued monetary and fiscal policy support. High corporate profits from a depreciated yen and earlier delays in implementing previous projects will support business investment. In 2024, growth is expected to decline to 0.9 percent as the effects of past stimulus dissipate.
- For emerging market and developing economies, growth is projected to rise modestly, from 3.9 percent in 2022 to 4.0 percent in 2023 and 4.2 percent in 2024, with an upward revision of 0.3 percentage point for 2023 and a downward revision of 0.1 percentage point for 2024. About half of emerging market and developing economies have lower growth in 2023 than in 2022.
- Growth in emerging and developing Asia is expected to rise in 2023 and 2024 to 5.3 percent and 5.2 percent, respectively, after the deeper-than-expected slowdown in 2022 to 4.3 percent attributable to China's economy. China's real GDP slowdown in the fourth quarter of 2022 implies a 0.2 percentage point downgrade for 2022 growth to 3.0 percent—the first time in more than 40 years with China's growth below the global average. Growth in China is projected to rise to 5.2 percent in 2023, reflecting rapidly improving mobility, and to fall to 4.5 percent in 2024 before settling at below 4 percent over the medium term amid declining business dynamism and slow progress on structural reforms. Growth in India is set to decline from 6.8 percent in 2022 to 6.1 percent in 2023 before picking up to 6.8 percent in 2024, with resilient domestic demand despite external headwinds. Growth in the ASEAN-5 countries (Indonesia, Malaysia, Philippines, Singapore, Thailand) is similarly projected to slow to 4.3 percent in 2023 and then pick up to 4.7 percent in 2024.
- Growth in emerging and developing Europe is projected to have bottomed out in 2022 at 0.7 percent and, since the October forecast, has been revised up for 2023 by 0.9 percentage point to 1.5 percent. This reflects a smaller economic contraction in Russia in 2022 (estimated at -2.2 percent compared with a predicted -3.4 percent) followed by modestly positive growth in 2023. At the current oil price cap level of the Group of Seven, Russian crude oil export volumes are not expected to be significantly affected, with Russian trade continuing to be redirected from sanctioning to non-sanctioning countries.
- In Latin America and the Caribbean, growth is projected to decline from 3.9 percent in 2022 to 1.8 percent in 2023, with an upward revision for 2023 of 0.1 percentage point since October. The forecast revision reflects upgrades of 0.2 percentage point for Brazil and 0.5 percentage point for Mexico due to unexpected domestic demand resilience, higher-than-expected growth in major trading partner economies, and in Brazil, greater-than-expected fiscal support. Growth in the region is projected to rise to 2.1 percent in 2024, although with a downward revision of 0.3 percentage point, reflecting tighter financial conditions, lower prices of exported commodities, and downward revisions to trading partner growth.

- Growth in the Middle East and Central Asia is projected to decline from 5.3 percent in 2022 to 3.2 percent in 2023, with a downward revision of 0.4 percentage point since October, mainly attributable to a steeper-than-expected growth slowdown in Saudi Arabia, from 8.7 percent in 2022 (which was stronger than expected by 1.1 percentage points) to 2.6 percent in 2023, with a negative revision of 1.1 percentage points. The downgrade for 2023 reflects mainly lower oil production in line with an agreement through OPEC+ (Organization of the Petroleum Exporting Countries, including Russia and other non-OPEC oil exporters), while non-oil growth is expected to remain robust.
- In sub-Saharan Africa, growth is projected to remain moderate at 3.8 percent in 2023 amid prolonged fallout from the COVID-19 pandemic, although with a modest upward revision since October, before picking up to 4.1 percent in 2024. The small upward revision for 2023 (0.1 percentage point) reflects Nigeria’s rising growth in 2023 due to measures to address insecurity issues in the oil sector. In South Africa, by contrast, after a COVID-19 reopening rebound in 2022, projected growth more than halves in 2023, to 1.2 percent, reflecting weaker external demand, power shortages, and structural constraints.

## INDIAN ECONOMY

India is set to be the second-fastest growing economy in the G20 in FY 2022-23, despite decelerating global demand and the tightening of monetary policy to manage inflationary pressures. GDP growth will slow to 5.7% in FY 2023-24, as exports and domestic demand growth moderate. Inflation will crimp private consumption but moderate at the end of the projection period, helping, along with improved global conditions, to boost growth to 6.9% in FY 2024-25, in line with the 20-year average (excluding the COVID-19 recession). After a spike in 2022, the current account deficit will narrow as import price pressures abate. High medium-term global uncertainty reinforces the importance of continued efforts to raise potential output growth and resilience. Macroeconomic stability should be pursued through monetary policy geared towards anchoring inflation expectations and fiscal policy oriented towards debt control and targeting of current and capital spending. Improvements in the business climate, when combined with financial deepening and skills development, can boost investment and infrastructure and create more and better jobs.

The strong recovery has slowed Economic growth has lost momentum over the summer, due to a combination of erratic rainfall, which impacted sowing activities, and falling purchasing power. Concerns over demand conditions are considerable in services and infrastructure sectors, while consumers have become cautious regarding non-essential spending due to higher prices for food and energy. Tighter financial market conditions are weighing on the demand for capital goods, a leading indicator for aggregate investment. Export growth remains well-oriented, especially for services, and the progressive entry into force of comprehensive trade agreements with major partners is helping to improve prospects. Nonetheless, the monthly energy and food import bill keeps rising and the current account deficit widened in the July-September quarter to 2.9% of GDP. Headline inflation remains above 6% (the central bank’s upper bound of the tolerance band), mostly due to the trend increase in the price of food (which in India accounts for a larger share of the consumer basket than in any other G20 country). Unemployment estimates suggest improving labour market conditions in both urban and rural areas, but there are few signs of a wage-inflation spiral.

### Macroeconomic policies are turning restrictive

In line with the central bank's commitment to take calibrated action to bring headline inflation back within the 2-6% tolerance band and keep inflation expectations anchored, policy rates are expected to rise by 75bps, to reach 6.65% in February 2023 before the tightening cycle is paused. In fighting inflation, monetary policy is complemented by cuts in excise taxes and a series of measures taken by the government, such as the export bans on wheat, wheat flour, sugar and broken rice and a 20% export duty on some varieties of non-basmati rice. Such trade restrictions must be temporary, use transparent methodologies to determine their duration, and give due consideration to the effects on trading partners' food security.

Expanding infrastructure spending, such as on highways and railways, occupies a central position in the government strategy. These programmes are being successfully implemented, surmounting some technical obstacles at the state level. At the same time, prolonged targeted and non-targeted fiscal measures and rising interest rates weigh on the public debt. On current trends, tax collection will surpass the budgeted projections by the end of FY 2022-23, due to higher inflation and better compliance, thus reducing borrowing requirements. The projections assume fiscal tightening in the next biennium. There still remain considerable margins to improve efficiency, accountability, and transparency of public spending, devoting more resources to health and education and building fiscal space to enhance resilience.

### The economy will not escape the global slowdown

After hitting 6.6% in FY 2022-23, GDP growth is expected to slow in coming quarters, to 5.7% in FY 2023- 24, before reverting to around 7% in FY 2024-25. CPI inflation will remain above the central bank's upper limit target of 6% at least until early 2023 and then gradually recede as higher interest rates take effect. High inflation will slow household consumption and delay investment, as financing becomes more expensive, and exports will be affected by the economic slowdown in advanced countries and geopolitical tensions. Offsetting these forces, at least partially, some improvements can be expected as more contact-intensive services sectors normalise, including international tourism once borders are fully open and restrictions lifted.

Most risks to the projections are tilted to the downside and include a deterioration of banks' assets quality, despite enhanced provisioning and the establishment of a 'bad bank', as well as possible delays in fiscal consolidation and in

concluding bilateral trade negotiations. Declining geopolitical uncertainty, on the other hand, would boost confidence and benefit all sectors, as would faster-than-expected conclusion of free-trade agreements with key partners and the incorporation therein of services.

### **Progress in financial inclusion and energy security can be further extended**

India has recorded impressive progress in recent years in extending access to financial services to a larger portion of the population, including disadvantaged socio-economic groups. Leveraging the country's competitive strength in ICT, the Unified Payments Interface (UPI) and other tools are easing the transition towards a cashless economy. Nonetheless, gaps and challenges in the usage of financial services are still considerable: in particular, roughly a third of bank accounts are inactive. In order to enhance energy security, the use of LED bulbs in private and public spaces can have sizeable effects (savings of more than 4% of electricity final consumption per year); important results have been achieved and further actions are needed to develop appropriate financial instruments (for example, the Treasury is expected to debut on the green bonds market with a forthcoming INR 160 billion issue), test new business models and strengthen institutional capacity.

### **Road Ahead**

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

**GLOBAL ELECTRONIC AND RECOMMERCE INDUSTRY OUTLOOK**

**GLOBAL ELECTRONIC PRODUCT MARKET**

The global electronic products market grew from \$1186.56 billion in 2022 to \$1275.34 billion in 2023 at a compound annual growth rate (CAGR) of 7.5%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, a surge in commodity prices, and supply chain disruptions, causing inflation across goods and services and affecting many markets across the globe. The electronic products market is expected to grow to \$1657.45 billion in 2027 at a CAGR of 6.8%.

The electronic products market growth is aided by stable economic growth forecasted in many developed and developing countries. The International Monetary Fund (IMF) stated that the global GDP growth was 3.3% in 2020 and 3.4% in 2021. Recovering commodity prices, after a significant decline in the historic period is further expected to aid the market growth. Developed economies are also expected to register stable growth during the forecast period. Additionally, emerging markets are expected to continue to grow slightly faster than the developed markets in the forecast period. Stable economic growth is expected to increase investments in the end-user markets, thereby driving the market during the forecast period.

**GLOBAL RE-COMMERCE INDUSTRY:**

In times of climate change and global warming, sustainability becomes an ever more important topic also in retail. With a growing awareness of environmental issues, people’s consumption behaviour changes. According to the Statista Global Consumer Survey Content Special Sustainable Consumption, 51% of German consumers have the feeling that they can contribute to the tackling of environmental problems through their own daily behaviour. More than half of respondents pay attention to aspects like environmentally friendly packaging, animal welfare or fair trade. Second-hand purchasing is also a way to reduce carbon footprints. 52% of consumers are second-hand shoppers. In countries like France or the UK, the percentage is even slightly higher.

Re-Commerce is a relatively young term which describes the sale of pre-owned, sometimes unused and sometimes refurbished or recycled products mostly via online marketplace platforms in a form of circular economy.

According to the latest data published by Cross-Border Commerce Europe SPRL, the total European Re-Commerce market was worth €75 billion in 2021. Rising ecological awareness but also a higher price-sensitivity among consumers due to inflation drive the market further – for 2025, a market volume of €120 billion is expected, which corresponds to an increase of 60%. Also, the role that Re-Commerce plays in overall E-Commerce is expected to grow – the share of second-hand E-Commerce in the overall online retail market is forecast to be 14% in 2025, up from 10% in 2021.

As per the report of Statista in 2021, the Re-Commerce market in the United States was estimated at more than 160 billion U.S. dollars, a 15 percent increase from nearly 140 billion in 2020. That growth is expected to continue in the future, with a forecast to get close to 245 billion dollars by 2025.

## **TWO MAJOR PRODUCTS SEGMENT IN RE-COMMERCE INDUSTRY:**

### **1. Refurbished Electronics Products:**

The global Refurbished Electronics market size was valued at **US\$ 48.29 billion in 2023** and is expected to reach **US\$ 94.10 billion by 2030**, grow at a compound annual growth rate (CAGR) of **10% from 2023 to 2030**.

As per the current market research conducted by CMI Team, the global Refurbished Computers and Laptops Market is expected to record a CAGR of 11.6 % from 2023 to 2032. In 2022, the market size is projected to reach a valuation of USD 4.9 billion. By 2032, the valuation is anticipated to reach USD 12.6 billion.

- ✓ North America is the largest market for refurbished electronics, accounting for 35.3% of the global market share in 2022. - ✓ Europe is the second largest market for refurbished electronics, accounting for 27.7% of the global market share in 2022. Europe's refurbished electronics market has also gained traction due to stringent regulations promoting sustainable practices and consumer protection.
- ✓ Asia Pacific is the third largest market for refurbished electronics, accounting for 22.5% of the global market share in 2022. The Asia-Pacific region is witnessing significant growth in the refurbished electronics market, driven by a large population, increasing urbanization, and rising smartphone Countries like India, China, and South Korea have seen a surge in demand for refurbished smartphones and other electronic devices, catering to budget-conscious consumers who seek reliable options.

### **2. Apparel Re-Commerce Market:**

The Apparel Re-Commerce Market is likely to hold the global market at a moderate CAGR of ~24.6% during the 2022 to 2032. The global market holds a forecasted revenue of ~US\$ 72.12 Billion in 2022 and is likely to cross ~US\$ 652.3 Billion by the end of 2032.

In recent years, the re-commerce sector for garments has been growing quickly. An online marketplace that facilitates the purchasing and selling of used clothing is called apparel re-commerce. No matter if it is footwear or another accessory, apparel re-commerce has made it simpler for customers to buy and sell. There are a number of websites and online e-commerce websites, that are providing apparel and accessories to customers with discounted prices and attractive offers, helping the market to grow.

- ✓ American youth is supporting re-commerce market; as new fashion trends are taking over. Millennials and Generation Z in the US are interested in second-hand apparel products. There are multiple fashion trends in the US and updating one wardrobe from time to time is necessary. At such a time, resale marketplaces are the go-to place for American youth. Not just apparel and fashion products, there are several luxury products available for resale on these marketplaces. Due to changing lifestyles and increasing environmental awareness, Americans are embracing the apparel re-commerce market.
- ✓ China is the biggest manufacturer and consumer of apparel and accessories products. There is a number of brands and counterfeit manufacturers, providing different products to customers. Even though, purchasing second-hand clothing at a low price and using them is not attracting Chinese customers. Chinese customers are ignoring the resale markets, due to their social image and superstitions related to second-hand clothing. Also, fake and counterfeit products are the biggest concern for them. Again, viral infections and health concerns are other reasons that apparel re-commerce is not popular in China.

## **MARKET DYNAMICS OF RE-COMMERCE INDUSTRY:**

### **Why is it Growing?**

- ✓ **Millennials' adoption of the sharing economy:** Younger consumers who are now entering prime earning potentials have proven to favor the concept of sharing over owning. Immensely successful companies such as Uber and Airbnb are only a few that comes to mind to illustrate how the sharing economy is here to stay.
- ✓ **Consumer's desire to access used goods at a discount:** Bargain shoppers have the ability to easily shop overstock, out of seasons, or gently used products from trusted online stores without leaving their houses thereby having a FOMO Behaviour.
- ✓ **Powerful digital marketplaces (eBay, Craigslist, ThredUp, etc.):** The proliferation of reliable, easy-to-use digital marketplaces that make it easy for consumers to market and sell used goods are plentiful today. They range from offering a large variety of content (eBay and Craigslist) to curated content targeted to nice segments (Rent The Runway, The Real Real).
- ✓ **The environmental consciousness of consumers and brands alike:** Being able to resale used goods instead of throwing them away creates an environment where consumers can easily find an ethical outlet for the product and receive fair compensation. More concern towards sustainability and conscious consumption.

### **Common Risk in Re-Commerce Industry:**

## **INDIAN ELECTRONIC AND RECOMMERCE INDUSTRY**

### **INDIAN ELECTRONIC INDUSTRY**

The demand for a wide range of consumer durable goods is growing as a result of the ongoing increase in disposable income and technological innovation in India. This in turn is fueling fierce competition among the various consumer durable brands that are available across the country. India is viewed by multinational organizations as one of the primary markets from which future growth is likely to originate.

By 2025, India's Consumer Electronics and Appliances Industry is predicted to be the fifth-largest in the world. The Indian Appliances and Consumer Electronics (ACE) market is predicted to nearly double in the next 3 years, reaching approximately US\$ 17.93 billion (Rs. 1.48 lakh crore) by 2025. The Indian appliances and consumer electronics industry stood at US\$ 9.84 billion in 2021, and is expected to more than double to reach Rs. 1.48 lakh crore (US\$ 21.18 billion) by 2025. Electronics hardware production in the country stood at US\$ 63.39 billion in 2021.

As per the report issued by IBEF, the appliances and consumer electronics market in 2021 is US\$ 9.84 billion and the demand for electronics hardware in India is expected to reach US\$ 400 billion by FY24. The government anticipates that the Indian electronics manufacturing sector will reach US\$ 300 billion by 2024–25. According to RedSeer, India's consumer digital economy is projected to reach US\$ 800 billion by 2030, from US\$ 85-90 billion in FY20, driven by increase in online shopping.

**White Goods Consumer Durable Market Estimates:**

The White Goods market is estimated to cross \$21 Bn by 2025 expanding at a CAGR of 11%. Domestic manufacturing contributes nearly \$4.6 Bn on an average to this industry.

- Air Conditioner Market in India to increase to \$9.8 Bn by FY26 from \$3.8 Bn in FY21 at a CAGR of 20.8%.
- Refrigerator Market in India to increase to \$6.7 Bn by FY26 from \$3.8 Bn in FY21 at a CAGR of 9.5%.
- LED Lights Market in India to increase to \$8.1 Bn by FY26 from ~ \$3.6 Bn in FY21 at a CAGR of 18.64%.
- Personal Care Appliances (Dryers, Trimmers and Straighteners) Market in India to increase to ~\$1.4 Bn by FY26 from \$435 Mn in FY21 at a CAGR of 21%.
- Dishwasher Market in India to increase to \$93.5 Mn by FY26 from \$45.6 Mn in FY21 at a CAGR of 10.8%.
- By FY22, television industry in India is estimated to reach Rs. 1,227.34 billion (US\$ 17.56 billion). According to FICCI, India's TV production stood at US\$ 4.24 billion in FY21, and is expected to reach US\$ 10.22 billion by FY26, at a CAGR of 20%.

Demand for consumer durables in India has been growing on the back of rising incomes. This trend is set to continue even as other factors like rising rural incomes, increasing urbanisation, a growing middle class and changing lifestyles aid demand growth in the sector. Significant increase in discretionary income and easy financing schemes have led to shortened product replacement cycles and evolving lifestyles where consumer durables like ACs and LCD TVs are perceived as utility items rather than luxury possessions.

**INDIAN RE-COMMERCE INDUSTRY:**

Re-commerce, or reverse supply chain, entails offering new products in exchange for old ones; reselling returned products; repairing defective products; or recycling or refurbishing used products. It has great significance in today's times when there is growing awareness amongst businesses and consumers about the need to make environmentally responsible choices.

A report by Infogence Global Research estimated India's re-commerce at USD 29.54 billion in 2022 and projected it to grow at a CAGR of 6.15 percent by 2027. Some of India's leading online marketplaces, too, have taken to re-commerce for refurbished smartphones and appliances. The consumer trust and loyalty they have earned over the years now extends to their offerings of refurbished goods. These e-commerce players are driving better value realization and great experiences for consumers through technology-enabled features for easier accessibility, convenience, and affordability.

The report points out that the used smartphone market is seeing better margins for retailers compared to the sale of new smartphones. In 2021 alone, India witnessed the purchase of over \$15 billion worth of new smartphones online. With the number of smartphone users reaching the 550 million mark, it is estimated that, on average, a re-commerce app user sells more than two smartphones from each household when the need to upgrade to new devices rises, as per Red Seer's research.

Manufacturers and sellers of certain product types – automobiles, smartphones, electronic goods, and appliances in the lead – are embracing re-commerce for circularity and business growth. It is important to do so because e-waste, in particular, contains metals and components that are hazardous and can contaminate soil and water if not disposed of properly. The good thing is that much of this e-waste is recyclable. According to a Grant Thornton study, almost 31.5 million tonnes of electronics and appliances are discarded every year, of which many of the components can be recycled or reused.

## **TWO MAJOR PRODUCTS SEGMENT IN RE-COMMERCE INDUSTRY:**

### **1. Refurbished Electronic Product Market:**

Indian buyers are increasingly turning to refurbished electronic devices as global supply chain disruptions take up the prices of new products. While smartphones are primary growth drivers, other electronic products, too, have seen rising demand amid the growth of organized sellers of refurbished goods.

According to a report by research firm RedSeer, IT services major Tata Consultancy Services Ltd sources 100,000 refurbished laptops every year from organized reverse commerce (or re-commerce) companies.

Redseer said the refurbished electronics goods market in India could grow to \$11 billion in gross value by March 2026, up from approximately \$5 billion in March 2021.

As per the speaker of RedSeer, laptops, televisions, headphones, wearables, washing machines, and gaming consoles will constitute about \$1 billion of the market. "In India, wearables that could contribute to the sector would be the aspirational ones, such as the flagship Fitbits or the Apple Watch.

The RedSeer report, too, said smartphones account for 90% of the sector. Fuelling this growth are two factors—rising prices of new smartphone and higher profit margins for retailers.

### **2. Apparel Re-Commerce Market:**

In India, the fashion Re-Commerce industry is at a nascent stage. It is most likely that luxury brands, particularly in the ethnic segment will take the lead before re-commerce goes mainstream. The future of growth for fashion Re-Commerce is that of cautious optimism.

Fashion re-commerce is yet to gain significant traction in India. Although there have been several brands operating in the Fashion rental space a pure fashion re-commerce player is yet to emerge in India. Even the Indian Unicorn Meesha which started as a social commerce-enabling reseller has now pivoted to a pure-play e-commerce marketplace model.

## **Government Policies Supporting India's Sustainable Circular Economy**

A circular economy ecosystem refers to a closed-loop production model where resources are reused and kept in the production loop, allowing for more value generation. The objective is to retain as much value as possible from resources, products, and materials to create an ecosystem that sustainably promotes longevity, reuse, refurbishment, and recycling.

India's circular economy could touch \$45 billion by 2030, an opportunity startup can potentially to tap into, according to a report by venture capital fund Kalaari Capital. According to the report, "India is expected to become the world's third largest economy by 2030, accounting for about 8.5% of global GDP. If the global circular economy touches \$4.5 trillion by 2030, then we're looking at a \$45 billion opportunity provided India captures just 1% of this market. If India's share of the circular economy matches its contribution to global GDP at 8.5%, we'll have an over \$380 billion circular economy.

To drive the nation towards a sustainable circular economy, the government of India has been actively formulating policies and various incentivizing projects.

- 1) The government has implemented different rules to control plastic waste such as Plastic Waste Management Rules, e-Waste Management Rules, Construction and Demolition Waste Management Rules, and Metals Recycling Policy. These rules have been formed to achieve sustainable economic growth.

- 2) 11 committees have been formed by the government which comprise representatives from NITI Aayog and the Ministry of Environment, Forest, and Climate Change (MoEFCC), SMEs and industry representatives. These different committees have been formed for eleven focus areas to accelerate the transition from a linear to a circular economy. The committees will develop an extensive action plan for transitioning the economy from a linear to a sustainable circular economy in their respective focus areas. The committee will also take regulatory measures to ensure the efficient implementation of their recommendations and findings. The 11 focus areas wherein the government is focussing to accelerate the transition involve municipal solid waste and liquid waste, scrap metal, electronic waste, lithium-ion batteries, solar panels, gypsum, toxic and hazardous industrial waste, used oil waste, agriculture waste, tyre and rubber recycling and end-of-life vehicles (ELVs).
- 5) The National Action Plan on climate change working on formulating a comprehensive strategy for addressing climate change in India. It also focuses on measures to reduce emissions and adapt to the impacts of climate change.

To reduce greenwashing, the Securities and Exchange Board of India (SEBI) has introduced new guidelines for companies to disclose their environmental, social, and governance (ESG) performance. Under these guidelines, companies are required to disclose information on their environmental and social policies, performance, and risks, as well as their governance structure and practices. These principles are intended to give investors additional knowledge about a company's ESG performance so they can determine more informed investment choices. These rules also give businesses a structure for disclosure and reporting, which will aid them in improving their ESG performance. These new regulations will take effect in the 2023-24 fiscal year. The government of India will issue Sovereign Green Bonds (SGrBs) as part of its broader market borrowings to raise money for green projects. The earnings will be used to fund public sector initiatives to lower the economy's carbon intensity.

The implementation of a circular economy has numerous advantages including direct and positive implications for the competitiveness of companies, individual stakeholders, and the overall industrial sectors. To achieve an impactful circular economy transition, macro-economic level planning is important along with considering stakeholders. The government advocates about 7Rs of circular economy which includes Reduce, Reuse, Recycle, Redesign, Remanufacture, Refurbish, and Repair. These should be considered as guiding principles while designing new ventures, business parks, and industrial clusters. With a system-level approach and favourable economic conditions, India can become a sustainable manufacturing hub in the coming years.

Contingent liabilities are disclosed in respect of possible obligations that have arisen from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of future events not wholly within the control of the Company. #### **Phased implementation of Unified Payments Interface**

SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the "UPI Circulars") in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

**Phase I:** This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

**Phase II:** This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

**Phase III:** The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below

shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00.
